industry

 **AUDION**  
Packaging Machines

## Secure product integrity, validate processes, and guarantee compliance

Packaging medical, pharmaceutical, and life science products requires the highest levels of hygiene, sterility, and regulatory compliance to prevent risks and ensure quality. Validatable seals deliver reliable seal integrity and traceability, while hygienic, cleanroom-ready designs minimize contamination risks. This approach protects sensitive medical devices, pharmaceuticals, instruments, laboratory materials, and high-tech components throughout storage and transport.

### Audion Solutions

Audion delivers state-of-the-art validatable packaging technologies that guarantee seal integrity, regulatory compliance, and operational efficiency. Our robust, hygienic machines provide consistent performance, full traceability, and seamless integration, enabling you to meet stringent standards like ISO 11607, EN 868-5, and DIN 58953-7 while optimizing critical packaging processes.

- **Validatable Sealers:** Precise control for traceable seals on sterilizable materials;
- **Vacuum Solutions:** Advanced monitoring and air/gas flush for sterile packaging;
- **MAP-Capable Systems:** Controlled atmospheres for sensitive products;
- **High-Speed Baggers:** Flexible and validatable packaging automation;
- **Continuous Band Sealers:** Fast, validatable, controlled sealing for sterile products;
- **Cleanroom Solutions:** IP65-rated machines for clean environments up to ISO 5.

Why Choose Audion? Our packaging solutions give you the tools to safeguard patient safety, ensure compliance, and stay ahead in a highly regulated market:

- **Compliance:** Fully validatable processes meeting stringent regulatory requirements;
- **Integrity:** Precise seal control, full traceability, and support for IQ/OQ verification;
- **Hygiene:** Easy-to-clean designs ensuring maximum sterility & contamination control;
- **Reliability:** Durable machines for continuous operation in medical environments;
- **Flexibility:** Customizable options to adapt to diverse medical and pharma needs.
